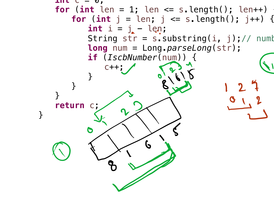
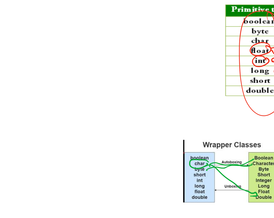
```
public static int CountCBnumber(String s) {
        int c = 0;
        for (int len = 1; len <= s.length(); len++) {
            for (int j = len; j <= s.length(); j++) {
                int i = j - len;
                String str = s.substring(i, j);// number me covert kro
                long num = Long.parseLong(str);
                if (IscbNumber(num)) {
                    c++;
                }
            }
        }
        return c;
    }
```





```
public static void main(String[] args) {
        // TODO Auto-generated method stub
        Integer a = 10;
        int a1 = 10;
    }
```
